## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-43, 65-71 and 73/65, drawn to method of rolling with recall rolling.

Group II, claims 44-63, 72/60, 73/44 and 74, drawn to a rolling apparatus with irregular rollers.

Group III, claims 64, 66-71, 72/64, and 73/64 drawn to a rolling apparatus with displaceable rollers.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

1. The invention of Group I requires that the section of metal strip to be rolled in the method be shorter than the circumference of the rollers.
2. The invention of Group II requires that the rollers have, on their surface two or more irregular and different separate circumferential sections succeeding one another in the direction of the circumference.

Art Unit: 3725

3. The invention of Group III requires that one of the rollers has the ability to be displaced up and down during rolling via a path determined by the desired cross section as a function of the advance of the metal strip.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
